Russ Hubbard

Member Comments

Gene discussed how the Board would handle the billing under the rate tiers, and that he's anxious to see how that's done.

Chris Stoner suggested to the Board that other member owners other than those on the Board be involved in the Compliance Committee having to do with the Best Management Practices that the Water Co. is supposed to institute. She suggested posting a list of Best Management Practices on the website. Hugh suggested Bob post what he's done on the website and link to BMP's.

John Payne wanted to know if there is an agreement with the Fire District as to how much water they can use. Hugh advised that there is an agreement, but he doesn't know what it is.

Russ Hubbard: There were five engines parked in Whispering Canyon on Thursday or Friday, practicing and using water. At least three districts were represented. He wanted to know if they advise us when they're going to do that? Hugh answered that they test hydrants.
